EDUCATION

Adani University

B.Tech in Computer Science (AI-ML)

2023 – 2027

CGPA: 7.48 / 10.0

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, HTML/CSS

Cloud & DevOps: Amazon Web Services (AWS), Docker, Git, GitHub

Frameworks/Libraries: Next.js, React, Node.js, Express, Hono, FastAPI, Tailwind CSS

Tools & Databases: PostgreSQL, Supabase, Prisma, MongoDB, Linux/Unix

EXPERIENCE

Appendo Consulting and Service

May 2026 – Present

UI/UX Intern

Vadodara, Gujarat

- Designing and developing intuitive user interfaces and seamless user experiences for a new, interactive mock interview platform.
- Creating wireframes, interactive prototypes, and responsive layouts to ensure accessibility and consistent design across multiple devices.
- Building Tyroo Placement OS, a full-stack placement management platform, developing student dashboards, drive calendar, and placement analytics using Hono, Supabase, and Prisma.

PROJECTS

Ieltsprep-ai | Node.js, Express, Next.js, OpenRouter, Groq Whisper

- Built and deployed a full-stack AI IELTS preparation platform covering all four IELTS modules – speaking, writing, reading, and listening – with instant feedback mapped to official grading criteria.
- Integrated Groq Whisper for real-time speech transcription and pronunciation analysis, and OpenRouter LLMs for line-by-line writing feedback, grammar correction, and vocabulary suggestions.
- Implemented user authentication and a personal analytics dashboard tracking band-score progression, task completion, and feedback history across practice sessions.

Harvest Relay - Food Redistribution Platform | Next.js, Prisma, PostgreSQL (Neon), Leaflet

- Constructed a full-stack platform with role-based donor/NGO portals to manage the complete food donation lifecycle from listing to delivery confirmation.
- Engineered secure API workflows with NextAuth (JWT sessions) and Leaflet-based geolocation to rank nearby NGOs and enable live status tracking.

Hospital Queue Management System (QMS) | Next.js, TypeScript, Supabase, Postgres

- Architected a full-stack platform with secure, role-based dashboards to manage appointments, patient queues, and discharge lifecycles.
- Developed interconnected lab and pharmacy modules, and automated medical report generation using pdf-lib, improving administrative accuracy.
